**Water gives life**

# Water is life

Approximately 2/3 of the Earth's surface is covered by water, from which only about 0.2 to 0.3% is suitable as drinking water.

## **Water is not, however, "just water"**

Water used to be drawn straight from wells or collected from channels. This meant that important properties and the natural structure of the water were preserved in their original form. These days, water is forced through miles of pipes!

Even when analyses and hygiene are alright, what we get from our pipes is energetically low-grade water. Pressure in the pipes and a variety of environmental influences can break and destroy the natural, information carrying structure of water.

## Water and our bodies

are retention in the tissues and a loss of elasticity. Many doctors therefore recommend drinking at least two to three litres of water daily.

Blood is the most important fluid in our bodies and has a high water content. It is composed of 45% blood cells and 55% plasma (which is 90% water). Our civilisation and diet causes the blood to be increasingly impure and fungi and parasites find it an ideal medium. This is becoming an increasing problem for human beings. Instead of changing our diet and drinking water, we introduce ever more chemicals into our bodies.

Saliva and urine production are reduced even by a slight decrease in water quality. At 20 % lower proportions of water, there is acute danger to life.

If the water supply is reduced, connective tissue shrinks, which especially affects the skin (face, hands, throat and legs). Blood pressure or blood sugar levels usually rise. Secondary effects

## Drink water even when you are not thirsty!

A large proportion of our metabolic processes evidently take place in a network of structured water. Disturbances of the structure thus affect the whole body.

The most advanced scientific knowledge shows that the microwaves of mobile and cordless phones, among others, can radically change the structure of our body water. Many doctors therefore recommend drinking high quality water to positively compensate this alarming stress.

### Body water content:

embryo	90%
infant	80%
one year old	65%
15 years old	over 60 %
50 years old	under 60 %
60 years old	approx. 50%

## Water is more than just a chemical formula

Although water is one of the most common elements on the planet Earth, you could say that among natural phenomena it behaves in the strangest or most wonderful way, depending on your point of view.

**For example:** According to the laws of nature, substances expand when they get hot and shrink when they get cold. Water behaves differently. It expands when it freezes and its specific weight is reduced. Thanks to the anomalies of water, fish can survive winter in stagnant water! Water is heavier at 4°C than when colder, and sinks to the bottom. At the bottom of lakes it is therefore warmer than on the surface, and right at the top it is coldest of all. Thus the lake begins to freeze from top to bottom, while under the ice cover the warmer water layers in the depths only cool very slowly and remain fluid. Fish can survive the winter there. If bodies of water froze from the bottom to the top, all the water would soon be frozen - which according to the "laws of nature", is what should be expected.

Water consists of two gases - hydrogen and oxygen - however, water is a liquid and not a gas unlike other similar combinations of elements.

## Water as an information carrier

“Water” - this familiar and yet mysterious element is more than just the chemical formula  $H_2O$ . It now seems to have actually been proved that water in itself has a memory, i.e. it can store information taken on from its environment. Diploma physicist Dr. Wolfgang Ludwig proved in his water analyses that water, even after the removal of toxins, can still show electromagnetic pulsations.

Source: Wasser vom Reinsten (“Purest water”) - Dr. Hendel

Also university lecturer Dr. Ivan Engler deals with the theme of water as information transmitter and describes this in his reference work “Water”.

## Making water memory visible

In the sixties, currents investigator **Theodor Schwenk Dip. Eng.** gave us fascinating images of drops.

The Japanese water investigator **Dr. Masaru Emoto** also caused a stir worldwide with his water crystal photography. In Dr. Masaru Emoto's technique, water drops are shock-frozen and then photographed enlarged 200-500 times. With his method, he studied hundreds of water samples from a wide variety of water pipes, but also from lakes and glaciers in many different places around the world. In this way, Emoto learned that wa-

ter from natural sources forms beautiful hexagonal structures, while contaminated or stressed water shows chaotic or broken crystals.

## The Aqua Power Joint water vitaliser

With the Aqua Power Joint, a patented water vitaliser and chalk transformer, water regains its original information from its natural source. With the Aqua Power Joint, an optimal energising of the water is achieved.

The functioning of the device was tested by **doctors and scientists from Austrian universities in long-term studies (BOKU Wien, Karl-Franzens-Universität Graz)**. The results demonstrate a clear improvement of the bodily states of humans and animals, as well as plants.

- **25 year functional guarantee**
- **no energy costs**
- **easy to install**
- **100% environmentally friendly**
- **Handmade in Austria**

## With the Aqua Power Joint, you have a natural spring at home, in the garden, biotope, swimming pool and in all areas where people animals and plants need healthy water.

The Aqua Power Joint creates a permanent and constantly renewing energy whirl with healing information, through the combination of dia-, para-, and ferromagnetism. This is achieved by 999 pure silver suspension incorporated into the device, built onto the water pipes, transmitting it to the water as it flows through it.

Pure silver, gold and platinum resonate with water molecules. It has a naturally prophylactic and protective effect, by strengthening the immune system. A special coloured light spectral lens with genial  $7,5 \times 10^{14}$  HZ (from the cloured light spectrum) for the natural conservation and refinement of healing energies

protects from harmful influences such as electrosmog, earth rays, etc. In addition, all the minerals, trace elements and crystals required by the human body are in the Aqua Power Joint.

**The Aqua Power Joint is entirely handmade,** generates over 40,000 healing energy frequencies from bio-resonance and Schumann frequencies and activates all body energies. Aqua Power Joint energised water boosts the effects of Bach flowers, Schüssler salts and the entire homeopathic range.

## The following advantages have been observed using the Aqua Power Joint:

- Your water will be energetically more valuable, more vital and kinder to your skin, while minerals are preserved.
- Improvement in taste of food and drink prepared with vitalised water. They are far milder and more digestible, washed fruit and vegetables stay fresher longer.
- Scientific and medical studies demonstrate the positive benefits on the entire organism. Increased sense of wellbeing.
- Chalk buildup is reduced and is easier to remove (lower repair costs, less washing and cleaning material due to higher dissolving capacity).
- Clearer and longer-lasting water in pools, biotopes and fish ponds: Savings on chemicals, less algae buildup, better survival for fish and improved reproduction rates.
- Animals perform better and have greater resistance, seedlings sprout sooner, better and stronger growth and stronger root growth in plants and trees. Also, higher fruit productivity and lower fungal infections in fruit and vegetables.

## Quick and easy to install

The Aqua Power Joint is maintenance free and works without an electrical connection or additives. It can be installed on all types of water pipes - whatever their condition.

Your Aqua Power Joint creates a permanent energy whirl by combining magnetisms, which realigns water molecules. For this reason, maintenance and chemical additives are unnecessary.

Bend the wires of your Aqua Power Joint upwards. Caution: Do not pull! Your device could be damaged. Do not use pliers or similar tools to affix.

Tighten your Aqua Power Joint locker firmly under the water pipe. The effect begins immediately on installation.

### Installation tip:

The Aqua Power Joint can be installed on all types of water pipes - whatever their condition. It is installed behind the water meter or air vent. In homes, installation is carried out at the stop valve.

**Important:** Electromagnetic fields (pumps, generators, etc.) should remain approx. one metre away from the Aqua Power Joint.

## Excerpts from some studies and reports

**The Aqua Power Joint was tested in Austria by doctors and universities and its functioning found to be highly successful!**

### **Ecology Bureau Graz - investigation in the environmental field under the biologist Dr. Romana Ull**

Changes tested in vivo on the human body through the use of water activated by "Aqua Power Joint" demonstrate for the chosen measurement method a significant improvement in the energy balance of the meridians, allowing the conclusion that a contribution has been made towards a general improvement of bodily state of the people tested.

Average values for 800 people in meridian diagnosis by Dr. Voll

**Red:** Measurement value after consuming normal water

**Blue:** Measurement value after consuming the vitalised Aqua Power Joint water

The graph demonstrates the exemplary meridian state of the test subjects (from a wide test series).

### **Med. univ. Dr. Wolfgang R. Auer, doctor of the environmental, legally certified expert**

1. Report from 7th January 2000
2. Report from 4th November 2000

Report analysis: From an environmental and bacteriological standpoint, no objections to the installation of the Aqua Power Joint have been demonstrated. Moreover, from the perspective of alternative and complimentary medicine, the Aqua Power Joint water vitaliser is to be positively valued and recommended. Positive effects on the organism, especially on the immune system, are significantly recognisable.

## Franz Pirker, energetics practitioner

ETAScan is a bio-energetic collection system which allows the body to be quickly measured in terms of energy, from head to toe. The ETAScan energy balance system powerfully demonstrates the effects of water vitalised by the Aqua Power Joint on the organism.

ETAScan is a bio-energetic collection system which allows the body to be quickly measured in terms of energy, from head to toe. The ETAScan energy balance system powerfully demonstrates the effects of water vitalised by the Aqua Power Joint on the organism.

## Univ. Prof. Dr. Rudolf Lietgrieb, University for Ground Culture of Vienna (BOKU), Institute for natural science/ Department of Animal Nutrition

Report analysis: The conclusion can be drawn from the results that the Aqua Power Joint has improved return on capital for

chicken feed, through a positive influence on feed expenses and slaughter percentage. Furthermore, water treated with Aqua Power Joint should have a positive influence on the heart stress of the animals. The difference between the heart weight of the control and test group was highly significant.

## Univ. Prof. Dr. Wilhelm Knaus, University for Ground Culture in Vienna (BOKU), Institute for farm animal science

Report analysis: Through the use of the water vitaliser, significantly fewer broiler parent birds (hens) failed. The results of the practical study allows the conclusion that the uptake of vitalised water had a positive effect.

**Univ. Prof. Ma. Dr. Helmut Guttenberger, Institute for Plant Physiology, Karl-Franzens-Universität, Graz**

Diploma thesis “Anatomical and morphological effects of activated water on *Vicia faba*”, by Mag. Petra Stadler: From the results it can be seen that the seeds swell faster and more and later the plants have a higher fresh weight (=water) when they have been supplied with Aqua Power Joint vitalised water. Particularly significant were the differences in root length, root weight, sprout weight and leaf span of the primary leaves and the length of the split opening.

Diploma thesis “Plant physiological investigations of *Vicia faba* on the effects of activated water”, by Mag. Birgit Leirouz: From a morphological point of view, there were clear differences. The treated plants showed a weight gain of the secondary roots and also of the sprout weight. These results were also statistically underpinned by a 5% level. A trend towards improved germination capacity and lower contamination from unidentified fungi of the *Vicia faba* seeds was noted. The dry weight of the secondary leaves of the activated plants was higher in comparison to the control plants.

**0. Univ. Prof. Mag. Dr. Karoline Jezik, University for Ground Culture, Vienna (BOKU) Institute for plant sciences and plant biotechnology**

**The following plants were used for this study:**

- spinach
- radishes
- lettuce

From the results it can be concluded that spinach treated with Aqua Power Joint achieved a higher dry mass. The colour intensity (clarity) of the leaves was darker on the outer lettuce leaves and the spinach. The spinach leaves were also darker green. The results of °Brix total factor of the soluble dry substance, in liquid and therefore similar to the sugar content, were significantly higher for radishes and spinach plants than with tap water. The “P Value” for stress factors as measurement of bio-

logical quality are lower for spinach and lettuce than with tap water, i.e. are subject to less production stress and have higher nutritional physiological values than the products which were “tap water variety”.

**O. Univ. Prof. Mag. Dr. Karoline Jezik, University for Ground Culture, Vienna (BOKU) Institute for garden, vegetable and wine culture**

**Partial report of the study-** Influence of “energised water” on apple trees by Univ. Prof. Dip.Eng. Dr. Herbert Keppel and Univ. Asst. Dipl.-Ing. Dr. Andreas Spornberge at individual tree yield, in the first test year there was a higher individual yield for all the three varieties studied, which is associated with a higher individual fruit weight, in the variety which had been watered with Aqua Power Joint. Regarding apple scab, it resulted that across the whole trial average the varieties energised with Aqua Power Joint showed the lowest values of apple scab, irrespective of variety.

**Water has a memory.  
What kind? You decide!**
